Les Usines et le Plastique (ANSWERS)

Secondary MFL

Name:

Date:

Reading Passage

Les usines fabriquent beaucoup de produits, mais elles causent aussi de la pollution. Elles libèrent du dioxyde de carbone, ce qui affecte le climat. L'industrie du plastique est un grand problème. Le plastique n'est pas bon pour l'environnement. Quand les gens jettent le plastique, il pollue nos rivières et nos océans. Le bruit des usines est aussi une forme de pollution. Nous devons réduire notre consommation de plastique.

Questions

1. What do factories do?

Answer: manufacture lots of products

Note: The text says "Les usines fabriquent beaucoup de produits".

[1 mark]
